

PlaceExportToJsonVisitor
::visit

PlaceExportToXmlVisitor
::visit

Mall::hasFreeParking

```
graph LR; A[PlaceExportToJsonVisitor::visit] --> C[Mall::hasFreeParking]; B[PlaceExportToXmlVisitor::visit] --> C;
```

The diagram illustrates a visitor design pattern. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'PlaceExportToJsonVisitor' followed by '::visit' on a new line. The bottom box contains the text 'PlaceExportToXmlVisitor' followed by '::visit' on a new line. On the right, there is a gray rectangular box with a black border containing the text 'Mall::hasFreeParking'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both visitor methods are designed to interact with the 'hasFreeParking' method of the 'Mall' class.
