PanoramicPoints::isNightLit

```
graph LR; A[PlaceExportToJsonVisitor::visit] --> C[PanoramicPoints::isNightLit]; B[PlaceExportToXmlVisitor::visit] --> C;
```

The diagram illustrates a call graph or dependency. On the left, two white rectangular boxes represent visitor methods: 'PlaceExportToJsonVisitor::visit' (top) and 'PlaceExportToXmlVisitor::visit' (bottom). On the right, a gray rectangular box represents the target method 'PanoramicPoints::isNightLit'. Two blue arrows originate from the right side of the white boxes and point towards the left side of the gray box, indicating that both visitor methods call or depend on the 'isNightLit' method.
