

PlaceExportToJsonVisitor
::visit

PlaceExportToXmlVisitor
::visit

Museum::hasAudioGuideAvailable

```
graph LR; A[PlaceExportToJsonVisitor::visit] --> C[Museum::hasAudioGuideAvailable]; B[PlaceExportToXmlVisitor::visit] --> C;
```

The diagram illustrates a visitor pattern. On the left, two boxes represent visitor methods: 'PlaceExportToJsonVisitor::visit' (top) and 'PlaceExportToXmlVisitor::visit' (bottom). On the right, a shaded box represents the target method 'Museum::hasAudioGuideAvailable'. Two blue arrows point from the visitor methods to the target method, indicating that both visitors implement the logic for this specific target.
