

PlaceExportToJsonVisitor
::visit

PlaceExportToXmlVisitor
::visit

LocalMarket::isSeasonal

```
graph LR; A[PlaceExportToJsonVisitor::visit] --> C[LocalMarket::isSeasonal]; B[PlaceExportToXmlVisitor::visit] --> C;
```

The diagram illustrates a call graph or dependency. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'PlaceExportToJsonVisitor' followed by '::visit' on a new line. The bottom box contains 'PlaceExportToXmlVisitor' followed by '::visit' on a new line. On the right, there is a gray rectangular box containing the text 'LocalMarket::isSeasonal'. Two blue arrows originate from the right side of the white boxes and point towards the left side of the gray box. The top arrow starts from the right side of the top white box and points to the top-left corner of the gray box. The bottom arrow starts from the right side of the bottom white box and points to the bottom-left corner of the gray box.
