PlaceExportToJsonVisitor  
::visit

Shopping::isOutdoor

```
graph LR; A[PlaceExportToJsonVisitor::visit] --> C[Shopping::isOutdoor]; B[PlaceExportToJsonVisitor::visit] --> C;
```

The diagram illustrates two separate calls to the `PlaceExportToJsonVisitor::visit` method. Each call is represented by a white rectangular box with a black border. Both boxes have arrows pointing to a single gray rectangular box on the right, which represents the `Shopping::isOutdoor` method. This suggests that the `visit` method is being invoked multiple times, each time leading to the `isOutdoor` method.
